Subject: EtO

Jess,
I will not be on the call, I will be in NYC with Sophie on a college tour of Fordham U. Let's talk in the morning on who has what to make sure any info that we were to get together you have for the meeting. I have to take Soph or orthopedic doctor tomorrow too, so I will be leaving the office around 12:30pm

Report out on information gathered to answer the following questions for the top 3 facilities: Union Carbide, Croda, and Braun -

- What are the total EtO emissions?
- What are the total facility emissions?
- Are the facilities located in EJ Areas?
- Are there any current controls?
- What are the cumulative impacts from ethylene oxide and the other air toxics released at the facilities?
- Trending population. Are there areas that have a large growth in population within the last few years?
- What is the compliance history/status of the facility?
- What is the Title V permit status (for major sources)
- Are there any pending construction permit applications?
